

Sounds of Intent (expanded framework)

	Level 1	Level 2	Level 3	Level 4	Level 5	Level 6	
Segments	R.1 encounters sounds makes sounds unknowingly	R.2 makes or controls sounds intentionally	R.3 interacts with others using sound	R.4 responds to simple patterns it sounds (made through repetition or regularity)	R.5 makes sounds intentionally through repetition or regularity	R.6 interacts through 'imitating' other sounds or through imitating self being heard	
Elements A	R.1.A is exposed to a rich variety of sounds the sounds made by life-processes are performed, explored and their movements are used to make or move sounds	R.2.A shows an awareness of sounds – potentially of an increasing variety	R.3.A makes sounds intentionally, potentially through a response to sounds and responding to sounds being made	R.4.A recognises and responds to the responses of others	R.5.A interacts with sounds through repetition	R.6.A recognises and responds to distinctive groups of musical sounds ('motifs') and links them coherently	
Elements B	R.1.B is exposed to a wide range of music	R.2.B sounds are made or controlled through rhythmic movement	R.3.B on/off-rhythms model interaction through sound	R.4.B expresses feelings through sound	R.5.B sounds are made to stimulate a response in sound	R.6.B distinguishes groups of musical sounds ('motifs') and links them coherently	
Elements C	R.1.C is exposed to music in different contexts	R.2.C produces sound production and/or control over it in a range of contexts	R.3.C actively explores interaction through sound independently of context	R.4.C produces sounds intentionally in a range of contexts	R.5.C recognises and responds to musical patterns formed through regular change	R.6.C recognises and responds to musical motifs living repeated or varied	
Elements D	R.1.D is exposed to musical sounds that are automatically linked to other sensory input	R.2.D some activities to produce sound are automatically in nature	R.3.D some activities to produce interaction through sound are automatically in nature	R.4.D responds to musical sounds limited to other sensory activity	R.5.D interacts through sound: includes action using the other senses too	R.6.D uses sound to symbolise other things	
	reactive	proactive	interactive	segments	pure sound and music	sound and music related to other things	technical elements
	text-based					area backgrounds
